REQUEST FOR APPROVAL TO RELOCATE MIXED RESIDUES INVOLVED WITH THE  
BUILDING 991 RELOCATION PROJECT - JMK-0783-92

Compliance Order No. 91-07-31-01 (the Order) issued on July 31, 1991 requires that all backlog mixed residue container storage areas meet specified physical compliance requirements. In addition, the Order specifies that the Colorado Department of Health (CDH) must approve the movement of all drums between backlog mixed residues storage areas prior to their transfer.

Enclosed is a draft letter to the CDH requesting approval for the movement of mixed residues to allocate space for the Building 991 immediate relocation project. The proposed plan is divided into two phases: the immediate relocation project involves relocating the material out of the suspect areas in Building 991, and the long-term relocation project will involve additional movement that has not yet been determined. If the movement in Phase II involves any mixed residues, approval will be requested.

If you have any questions or require additional information, please contact Tim Schescke at extension 3020 or John Wrapp at extension 5883.

REQUEST FOR APPROVAL TO RELOCATE MIXED RESIDUES INVOLVED WITH THE  
BUILDING 991 IMMEDIATE RELOCATION PROJECT

Compliance Order No. 91-07-31-01 (the Order) issued on July 31, 1991 requires that all backlog mixed residue container storage areas meet specified physical compliance requirements. In addition, the Order specifies that the Colorado Department of Health (CDH) must approve the movement of all drums between backlog mixed residues storage areas prior to their transfer. The Rocky Flats Plant (RFP) requests your approval of the following container movement plan to allow RFP to meet the requirements of the Order.

Relocation of mixed residue containers is necessary to allocate space for the removal of Special Nuclear Material (SNM) from the structurally suspect and high moisture vault areas in Building 991 to areas which meet safety, environmental, and safeguards and security requirements. The proposed plan is divided into two phases: the immediate relocation project involves relocating the material out of the suspect areas in Building 991, and the long-term relocation project will involve additional movement that has not yet been determined. If the movement involves any mixed residues, approval will be requested.

RFP proposes that in the immediate relocation phase approximately 450 drums of mixed residues be transferred from the following backlog storage areas:

Building 371 (Rooms 3606, 1101, 1208)

These residue containers will be moved to the following areas for storage:

Building 371 (Rooms 3321, 2207)

Building 776 (Room 127)

Building 777 (Area 2, Area 3, Area 8)

If we do not receive your response to our proposal by August 20, 1992, we will assume you approve and will begin the container transfers in order to relocate material from Building 991.

If you have any questions, please contact Warren Seyfert of my staff at 966-5925 or Allen Schubert of EG&G Rocky Flats, Inc. at 966-5251.
